Mit dem Fernlenk-Set/Radantrieb und Servo kann das Modell motorisiert werden. Der Radantrieb ist mit 3-Gang-Getriebe, Kardanwelle und Differential ausgerüstet. Das Servo lenkt das Fahrzeug in die gewünschte Fahrtrichtung.

Le modèle peut être motorisé grâce au poste de pilotage à distance/au pont et au servo. Le pont est équipé d'une boîte de 3 vitesses, d'un arbre de transmission et d'un différentiel. Le servo permet de diriger le véhicule dans la direction souhaitée.

Con el estuche de control remoto, rueda propulsora y el servo el modelo puede entrar en movimiento. La rueda propulsora está equipada con una caja de cambios de 3 velocidades, árbol de cardán y el diferencial. El servo dirige el vehículo en la dirección deseada.

Med fjärrstyrningssetet/hjuldrivningen och servon kan modellen motoriseras. Hjuldrivningen är utrustad med växellåda med tre hastigheter, kardanaxel och differential. Servon styr fordonet i önskad riktning.

The model may be motorized by means of the remote control set/wheel drive and servo facility. The wheel drive mechanism has been equipped with three-speed transmission, universal joint shaft and differential gearing. The servo facility steers the vehicle into the required direction.

Door middel van de set voor het besturen op afstand/wielaandrijving en servomechanisme kan het model gemotoriseerd worden. De wielaandrijving is met een versnelling met drie gangen, cardanas en differentieel uitgerust. Het servomechanisme stuurt de wagen in de gewenste richting.

Il modello può essere motorizzato con impianto di telecomando/motore alle ruote e servo. L'impianto motore è fornito di cambio a tre marce, albero cardanico e differenziale. Il servo dirige il veicolo nella direzione desiderata.

Diagram illustrating the assembly of a 10x10 grid using orange blocks. The grid is composed of 100 blocks. The top row is labeled "1 x" and the rightmost column is labeled "4 x".

Mit dem Funkfernsteuerungs-Set kann das mit Fernlenk-Set ausgerüstete Modell fern-gesteuert werden. Funktion: stufenlose Fahrgeschwindigkeit, proportionale Lenkung.

Le modèle équipé du poste de pilotage à distance peut être télécommandé au moyen du poste radio de télécommandes. Fonction: vitesse de marche progressive, direction proportionnelle.

Con el estuche de radiotelemando, el modelo equipado con el control remoto puede ser dirigido a distancia. Función: velocidad de marcha sin escalones, dirección proporcional.

Med radiofjärrstyrningssetet kan den med fjärrstyrning utrustade modellen fjärrstyras. Funktion: steglös körhastighet, proportionell styrning.

By means of the radio control, the model equipped with the remote control set, can be remote-controlled. Function: infinitely variable speed, proportional steering.

Door middel van de set voor het draadloze besturen op afstand kan het voor het bedienen op afstand uitgeruste model op afstand bestuurd worden. Functie: Rijsnelheid traploos regelbaar, proportionele besturing.

Con l'impianto di radiotelecomando il modello fornito di impianto di teleguida può essere telecomandato. Funzione: velocità di marcia variabile senza limiti, comando sterzo proporzionale.

Mit dem Servo zum Lenken und Schalten kann das 3-Gang-Getriebe ferngesteuert geschaltet werden.

By means of the servo facility for steering and the gear shifting, the three-speed transmission may be remote controlled.

La boîte de 3 vitesses peut être mise en circuit par télécommandes grâce au servo de direction et de changement de vitesses.

Met het servomechanisme voor het besturen en schakelen kunnen de drie versnellingen op afstand geschakeld worden.

Con el servo para dirigir y cambiar, la caja de cambios de 3 velocidades puede ser cambiada con el control remoto.

Con il servo per la guida e l'innesto delle marce, il cambio a tre marce può venire manovrato per telecomando.

Med servon för styrning och växling kan växel-lådan med tre hastigheter växlas fjärrstyrt.

Die Seilwinde kann motorisiert werden mit Minimotor + Getriebe (mini-mot 1) oder Minimotor (mini-mot 10).

The cable winch may be motorized either by means of a mini-motor and gear unit (mini-mot 1) or by mini-motor (mini-mot 10).

Le treuil peut être motorisé au moyen du Minimoteur + boîte de vitesses (mini-mot 1) ou mini-moteur (mini-mot 10).

De kabbellier kan door middel van een minimotor + transmissie (mini-mot 1) of minimotor (mini-mot 10) gemotoriseerd worden.

El guinche de cable se puede motorizar con el minimotor + caja de cambios (mini-mot 1) o minimotor (mini-mot 10).

L'argano con fune può venire motorizzato con un mini-motore + cambio (mini-motore 1) oppure con mini-motore (mini-motore 10).

Vinschen kan motoriseras med minimotor + växlar (minimot 1) eller minimotor (minimot 10).
